Impact process and performance

# Plug directly into your health information system and view actionable data from user-friendly and custom configured reports.

Envision solutions include **intuitive interfaces** that provide information you need on demand while eliminating time-consuming and error prone manual data re-entry and manipulation.

From Network Health Care Systems to VA Medical Centers and all other medical facilities, Picis<sup>®</sup> Envision empowers hospitals with **timely data and analytics** to help administrators and clinicians make informed decisions which lead to improvements in departmental operations, clinical documentation, and financial results.

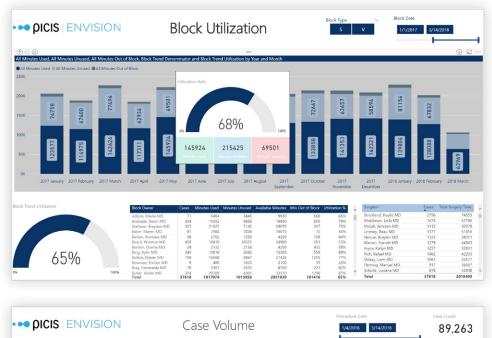

## Examples of perioperative reports available include

- ✓ Case Volume
- Procedure Log
- ✓ Turn Around Time
- ✓ Delays
- ✓ Case Cost

- Anesthesia Log
- Safe Surgical Checklist Audit
- Antibiotic Timing Analysis
- ✓ Procedure Detail
- Block Utilization
- Cancellations
- ✓ Overall Supply Cost
- Physician Cost
  Comparison
- ✓ Anesthesia Type Detail
- ✓ OR Medications Used
- Post Operative Nausea
  Occurrence

## **Envision OR Manager**

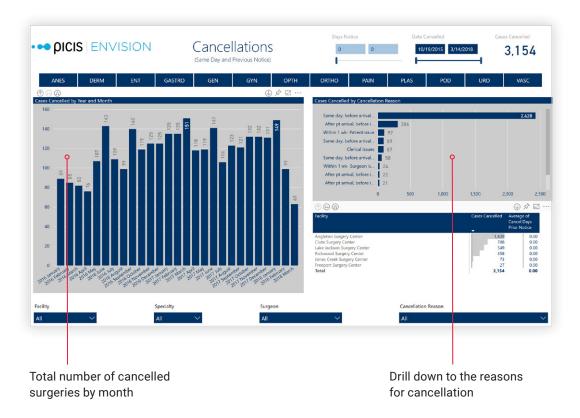

**Picis Envision OR Manager** provides key performance indicators for the surgical encounter. Perioperative service directors and others have one source of "truth" for block utilization; case costs and times; the impact of surgeons, services and procedures; and stock items and implants. Dynamic drill downs and filtering enable OR leadership to see what is going on behind the numbers. For enterprise deployments, multi-facility analysis is built-in, so users can benchmark and monitor the business performance of different sites.

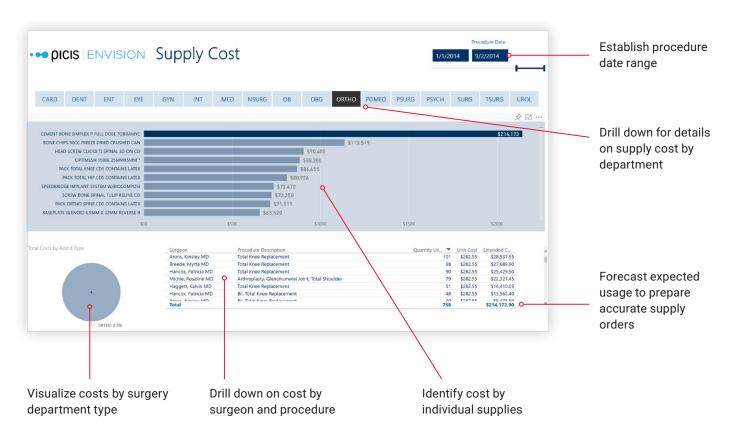

- Provides high level data with drill downs to micro data points
- No Protected Health Information used – data will drill down to case record id only
- Mobile applications such as iPhone, iPad for use anywhere in any meeting
- Exportable reports in Excel, PowerPoint or PDF

### Envision

Analyze data to identify areas where money can be saved on overall supply costs. View current cost by supply, surgeon or department.

#### 4

## **Envision Anesthesia Manager**

**Picis Envision Anesthesia Manager** provides key performance and quality indicators specifically for the anesthesia environment. Anesthesia chiefs and business managers can:

- Track perioperative quality indicators
- Investigate relationships within physiological data
- · Analyze productivity and supervision of anesthesia providers
- Evaluate anesthesia case throughput

The dashboards and reports allow hospitals to conduct a complete analysis of anesthesia milestones, medications and fluids, complications, physiologic data, billable hours, supervisory ratios and productivity.
